Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *The British Charophyta, Vol. 1* This account of the British Charophyta will be completed in two volumes. The present volume embraces the Nitelleae (Nitella and Tolypella) the second will include the Chareae (Nitellopsis, Lamprothamnium and Chara). The systematic portion is preceded by an introductory chapter dealing with the growth and structure of the Charophyta generally, their distribution, affinities, etc. For the facts concerning their cytology and minute histology we have had to depend largely on the writings of others, having ourselves had little opportunity for such studies. Many separate papers have been published on these branches of the subject, especially by Continental botanists, and students wishing for further information thereon will find full references to such papers in the bibliography to be included in the second volume. The plates illustrating the species included in this volume are almost all from the pencil of Miss Mary Groves, to whom we are much indebted for this important contribution to the work; twelve are now published for the first time; four have already appeared in the *Journal of Botany* ; among the latter is the beautiful illustration of *Nitella hyalina*, the work of the late Henry Groves; the two plates relating to structure, taken respectively from the works of De Bary and Pringsheim, and the text-figures, which have been gleaned from various sources, have been kindly copied for us by Miss G. M. Towsey. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections...
