Handwerk & Technik Gmbh Jun 2007, 2007. Taschenbuch. Book Condition: Neu. 241x172x15 mm. Neuware - The rain-fed mechanized agricultural sub-sector of the Sudan has high potential of building a national food stock and foreign exchange earnings, which could contribute substantially to agricultural development and hence the development of the whole economy as well. However, the agricultural production in this sub-sector is generally characterized by a high degree of instability which arises from the nature of the agricultural production that is dependent on uncontrollable weather conditions and unpredictable input and output prices, resulting in instable farm income. It is argued that the adoption of the recommended improved technologies in the rain-fed mechanized sub-sector of Gedaref in Eastern Sudan can increase farm income while diversifying by introducing sheep and gum arabic enterprises to sorghum monoculture may lead to farm income stability. Under these arguments in favor of diversification and use of the improved technology, this book therefore, evaluated different management strategies in this sub-sector under uncertainty. The financial feasibility of different investment and management strategies was evaluated under both; the current traditional and some improved cultural practices. The stochastic budgeting technique using the NPV of farm income as a measure of performance...
