Food of the Bobolink, Blackbirds and Grackles (Paperback)

By Foster Ellenborough Lascelles Beal

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1900 Excerpt: .are injurious, some of them greatly so. Useful predaceous beetles (Carabidas) are eaten to the extent of 2.5 percent of the food of the year, but are taken mostly in spring and early summer. Other beetles, belonging to several families, such as click-beetles (Elateridae), leaf-beetles (Chrysomelidae), May-beetles (Scarabasidae), and a few others, amount altogether to 3.5 percent. Grasshoppers (Orthoptera) are eaten practically in every month of the year, though none were found in the 11 stomachs taken in January. They constitute 4.7 percent of the whole food, and are exceeded by no other insects except beetles and caterpillars. The greatest number (amounting to 17 percent) are eaten in August, the grasshopper month. As all species of grasshoppers are injurious, their destruction must be counted to the credit of the bird. Caterpillars (larva? of Lepidoptera) form 5.9 percent of the year s food. They are eaten to...

Reviews

This book will never be straightforward to start on reading through but quite enjoyable to learn. Better then never, though i am quite late in start reading this one. Your lifestyle span will probably be convert once you complete reading this publication.

-- **Dr. Kadin Hane DVM**

This publication may be worth purchasing. it was actually writtern quite flawlessly and valuable. I am just happy to tell you that this is actually the very best book i actually have study inside my personal life and can be he best ebook for actually.
