

Adoption et diffusion du dispositif amélioré d'étuvage du Riz au Bénin

By Gabriel Lawin

Editions Universitaires Europeennes EUE Nov 2011, 2011.

Taschenbuch. Book Condition: Neu. 220x150x9 mm. This item is

printed on demand - Print on Demand Neuware - This study

aims at analyzing the impacts of socio-institutional factors on

the adoption and diffusion of improved rice parboiling

equipment in Benin. The analysis of this influence is based on the

use of Enterprise Web as comprehensive analysis tools of socio-

organizational interventions in rural areas. In order to ensure a

local supply of efficient and sustainable system, the Africa Rice

Center (AfricaRice) trained local artisans for duplication and

sale of the improved parboiling equipment. Four local NGOs and

two local government programs are involved in its

dissemination in some localities of Benin where traditional

parboiling already exists. The data collection took place from

August to October 2006. The results of the study identified four

factors like training of millers, provision of credit to processors,

involvement of collectors-processors, wholesalers-processors in

the training and creation of relationship between local artisans

trained for the duplication of the parboiler and the processor as

the major influential factors which can increase the extent of

adoption of the improved rice parboiling equipment by small-

scale processors. 144 pp. Französisch.

Reviews

Merely no words to explain. I really could comprehend everything out of this published e ebook. I found out this publication from my dad and i suggested this publication to learn.

-- Prof. Margarita Ledner PhD

This written pdf is fantastic. It normally is not going to expense a lot of. It is extremely difficult to leave it before concluding, once you begin to read the book.
